

Certification

Status 07/2019

Dear customers,

We consider the high quality requirements related to our products and processes as the basis for a good and successful long-term cooperation with you.

cab quality management is certified according to the international ISO 9001:2015 standard. It is adapted to the consistent basic orientation of management systems, called high level structure. Included are, amongst others, services at competitive prices, high efficiency, continuous process safety and innovation, risk management as a result of monitoring, display of responsibilities, a detailed product documentation, reliability and punctuality, as well as practicability independent from the industry. The environmental management of the cab production plant is certified according to the globally accepted ISO 14001 standard.

cab devices and systems from the areas of component, unit, product and package marking are operated by global players as well as by small and medium-sized companies from all kinds of industries all over the world. An optimized interface is crucial to represent and successfully realize customer requirements in the matters of processes and its approvals. As regards label materials, cab cooperates with a partner certified according to IATF 16949. On this occasion, cab offers structured sampling corresponding to PPAP methods.

If you have any questions, please contact Mr. Heiko Weber, h.weber@cab.de
