

## Statement regarding implementation of WEEE guideline

The guideline 2002/96/EG of January 27 2003 regarding electric powered and electronic old machines (WEEE) and the law (Elektro- und Elektronikgerätegesetz – ElektroG, from March 16 2005) about putting electric and electronic machines into market, taking them back and ensuring their environmentally sound disposal will impose obligations on the manufacturers regarding the marking of electric and electronic devices:

1. Each manufacturer has to mark its products in a way that the manufacturer is to identify by each single product.
2. The symbol which indicates the separate collection of electric and electronic devices is a garbage bin on wheels which has been crossed out (DIN EN 50419 ).
3. The product has to show an indication that it has been marketed after August 13 2005 (in Germany after March 23 2006).
4. Possibly manufacturers will have to take back the product or take over the cost of disposal (only B2C).

cab fulfills this guideline with the following measures:

1. cab is a registered as manufacturer at EAR  
Our WEEE registration number is: DE42488170  
The following brands are registered:  
cab PCB separators  
cab Product identification technology
2. Each product will show the symbol according DIN EN 50419 with an additional filled out bar and the indication of the company name and address or WEEE registration number.
3. Since our products are being delivered to B2B customers exclusively our customers remain responsible for disposal.
4. Since we do not deliver directly to endusers in the EU states we will only register in Germany. Our partners in the remaining EU states are responsible for registering as importers and therefore as manufacturers.
