

# Laser Marking System THS Basic for Type Plates

Made in Germany

# **Diode Pumped Ytterbium Fiber Laser**

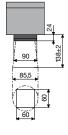

With the air cooled Ytterbium fiber lasers cab supplements the delivery program of high resolution, diode pumped marking lasers.

They mark on steel, aluminum, various plastics and many further materials with high beam quality and output power up to 20 watts.

The software cablase provides a graphical interface for real-time control or the COM interface for customized programming. cab offers solutions for integration into manufacturing lines, laser safety workstations as well foil and type plate marking systems.

Font Types		
Font formats	All Windows TrueType Fonts, filled or as outline, laser specific Single-, Double and Tripple Line Fonts; all fonts can be freely scaled and "wobbled".	
Font alignments	Any alignment and font direction, radial marking.	
Character width	Stretching and compres	sing possible.
Graphics		
Graphic objects	Line, circle, rectangle, polygon. Hatch and cross hatch for all basic graphic objects.	
Graphic formats	PLT, DXF, BMP, JPG, PCX, WMF, EPS, TIF All graphic elements can be scaled, moved, rotated, grouped or mirrored. Special tools are available to tune, align and resize the objects.	
Barcodes		
Linear Barcodes	2 of 5 Code 39, Code 93 Code 128	Codabar EAN UPC
2D-Barcodes	Data Matrix, ECC200, QRCode	
	Barcodes are variable in height, module width and ratio. Tuning possibilities and Check Digit generation. Inverted marking possible. Inverted marking of code.	
Additional Featur	es of the Marking Soft	ware
	phic data from Windows	based applications.
Programable laser parameters.		
Process and parameter file saving.		
Control of external and digital inputs and outputs is implemented		
in the software. Additional axes ( e.g. for lifting, rotating, linear axis ) can be		
controlled.		
controlled. cablase provides a COM Automation Server enabling the user		
to control the laser from any other user interface developed by		
e.g. Visual Basic, Borland Builder, provided the programming		
	language has ability to communicate to COM-objects.	

# Laser Marking System for Type Plates THS Basic

The THS Basic enables you to mark flat workpieces, preferable type plates made of metal or e.g. plastics precise and permanent.

Nevertheless the marking should contain bar code, text or graphics, the unique software application CABLASE marks your parts in a simply way and provides an intuitional operator front end for single and batch processing.

For marking 2D codes according to UID, HIBC or DIN/ISO additional software applications are available, able to interface to your PPS-system. cab is certified partner of SAP. Based on a universal software platform, all systems can become implemented.

Amongst others THS Basic will be applicable for production of e.g. gears, pumps, drives to manufacture specific plates or just for identification in series production.
