### 1 Introduction

#### 1.1 Instructions

Important information and instructions in this documentation are designated as follows:

<table>
<thead>
<tr>
<th>Category</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Danger!</strong></td>
<td>Draws attention to an exceptionally great, imminent danger to your health or life due to hazardous voltages.</td>
</tr>
<tr>
<td><strong>Danger!</strong></td>
<td>Draws attention to a danger with high risk which, if not avoided, may result in death or serious injury.</td>
</tr>
<tr>
<td><strong>Warning!</strong></td>
<td>Draws attention to a danger with medium risk which, if not avoided, may result in death or serious injury.</td>
</tr>
<tr>
<td><strong>Caution!</strong></td>
<td>Draws attention to a danger with low risk which, if not avoided, may result in minor or moderate injury.</td>
</tr>
<tr>
<td><strong>Attention!</strong></td>
<td>Draws attention to potential risks of property damage or loss of quality.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Note!</th>
<th>Advises to make work routine easier or on important steps to be carried out.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Environment!</strong></td>
<td>Gives you tips on protecting the environment.</td>
</tr>
<tr>
<td><strong>Handling instruction</strong></td>
<td>Reference to section, position, illustration number or document.</td>
</tr>
<tr>
<td><strong>Option</strong> (accessories, peripheral equipment, special fittings).</td>
<td>Information in the display.</td>
</tr>
</tbody>
</table>

#### 1.2 Intended Use

- The device is intended exclusively as a peripheral device for the cab printers of the SQUIX series for checking of printed linear barcodes and 2D codes. For that purpose each label must contain one code only. Any other use or use going beyond this shall be regarded as improper use. The manufacturer/supplier shall not be liable for damage resulting from unauthorized use; the user shall bear the risk alone.

<table>
<thead>
<tr>
<th><strong>Attention!</strong></th>
<th>To operate the Code Checker the firmware version 5.04 or higher is needed!</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Attention!</strong></td>
<td>The device is manufactured in accordance with the current technological status and the recognized safety rules. However, danger to the life and limb of the user or third parties and/or damage to the device and other tangible assets can arise during use.</td>
</tr>
<tr>
<td><strong>Attention!</strong></td>
<td>The device may only be used for its intended purpose and if it is in perfect working order, and it must be used with regard to safety and dangers as stated in the operating manual.</td>
</tr>
<tr>
<td><strong>Attention!</strong></td>
<td>Usage for the intended purpose also includes complying with the operating manual, including the manufacturer’s maintenance recommendations and specifications.</td>
</tr>
</tbody>
</table>

| **Notice!** | The complete documentation can also currently be found in the Internet. |
1.3 Safety Instructions

- Disconnect the printer from the electrical outlet before mounting or removing the code checker.
- Warning stickers must not be removed, as then you and other people cannot be aware of dangers and may be injured.
- The device may only be used in a dry environment, do not expose it to moisture (sprays of water, mists, etc.).
- Do not use the device in an explosive atmosphere.
- Do not use the device close to high-voltage power lines.
- Perform only those actions described in this operating manual. Work going beyond this may only be performed by trained personnel or service technicians.
- Unauthorized interference with electronic modules or their software can cause malfunctions.
- Other unauthorized work on or modifications to the device can also endanger operational safety.
- Always have service work done in a qualified workshop, where the personnel have the technical knowledge and tools required to do the necessary work.

**Warning!**
This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

1.4 Environment

Obsolete devices contain valuable recyclable materials that should be sent for recycling.

- Send to suitable collection points, separately from residual waste.

The modular construction of the printer enables it to be easily disassembled into its component parts.

- Send the parts for recycling.
- Take the electronic circuit boards to public waste disposal centers or to the distributor.

Table 1 Technical data

Table 2 Functionality depending on the code parameters
2 Installation

2.1 Unpacking

► Check stacker for damage which may have occurred during transport.
► Check delivery for completeness.

Contents of delivery:
• Code Checker CC100
• Operator’s Manual
• User’s Manual Colibri incl. CD
• USB Cable Configuration Scanner

Notice!
Please keep the original packaging in case the printer must be returned.

Attention!
The device and printing materials will be damaged by moisture and wetness.
► Set up label printer with code checker only in dry locations protected from splash water.

2.2 Mounting the Code Checker

Attention!
► Disconnect the printer from the electrical outlet before mounting the code checker.

Figure 1 Mounting the code checker

1. Push the guides (1) of the code checker (2) under the control panel (4) cover.
2. Press the code checker (4) against the printer. Make sure that the SUB-D 9 connector will be inserted in the peripheral port (5) of the printer.
3. Insert and tighten screw (3).
2 Installation

2.3 Adjusting the Scanner

In order to adapt the code checker to the code to be checked the scanner may be adjusted:

**Adjusting the reading distance**
- Adaptation to size and resolution of the code
  - Loosen screw (4).
  - Move the upper part of the retainer (3) with scanner.
  - Tighten screw (4).

**Adjusting the reading angle**
- Adaptation to the position of small codes on the label
  - Loosen 2 screws (1).
  - Turn the scanner (2).
  - Tighten 2 screws (1).

*Notice*
The moment of checking during the label feed can be set in the software. ▶ Programming Manual.
3.1 Commands list

**+VERIFYn**
Optional parameter for printer barcodes. This parameter allows the printer to verify that the printed data are identical to the data sent. «n» read offset in Y-position seen from the top of the barcode.

**+GOODBADn**
Optional parameter for printer barcodes. This parameter allows the printer to verify the barcode readability, without verifying the data content. «n» read offset in Y-position seen from the top of the barcode.

**,GOODBADn**
Optional parameter for graphic barcodes. This parameter allows the printer to verify the barcode readability, without verifying the data content. Mainly used with windows drivers. «n» read offset in Y-position seen from the top of the barcode.

3.2 Examples

```

A 1
```
To use the code checker with cablabel S3 Pro:

- Right-click on the barcode and select "Barcode".

- Click on "Verifier".
- Activate parameter "Enabled".
- Select "Goodbad" or "Verify".
- Change the read offset if necessary.

**Notice!**
For printer barcodes both types of verification are available. For graphic barcodes only the option « Goodbad » can be used.
Operation

- Insert transfer ribbon and labels [Operator's Manual of the printer].
- Install the power and computer connections.
- Switch on the printer.
- For operation in peel-off mode press ↓ to start the synchronization.
  Remove the blank labels peeled-off during synchronization.
- Send a print job.
  The first label will be printed. When the code to be checked reaches the scan area, the scanner will be triggered.
  - If the check result is positive, the next label will be printed.
    In peel-off mode the label must be removed from the peel position.
  - If the result is negative the error message Scan read error appears. After removing the faulty label the print can be repeated by pressing Repeat.

Reference to the EU Declaration of Conformity

The Code Checker CC100 complies with the relevant fundamental regulations of the EU Rules for Safety and Health:
- Directive 2014/30/EU relating to electromagnetic compatibility
- Directive 2011/65/EU on the restriction of the use of certain hazardous substances in electrical and electronic equipment

EU Declaration of Conformity
