### 1.1 Instructions

Important information and instructions in this documentation are designated as follows:

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>⚡️</td>
<td>Danger! Draws attention to an exceptionally great, imminent danger to your health or life due to hazardous voltages.</td>
</tr>
<tr>
<td>⚠️</td>
<td>Danger! Draws attention to a danger with high risk which, if not avoided, may result in death or serious injury.</td>
</tr>
<tr>
<td>!</td>
<td>Warning! Draws attention to a danger with medium risk which, if not avoided, may result in death or serious injury.</td>
</tr>
<tr>
<td>!</td>
<td>Caution! Draws attention to a danger with low risk which, if not avoided, may result in minor or moderate injury.</td>
</tr>
<tr>
<td>!</td>
<td>Attention! Draws attention to potential risks of property damage or loss of quality.</td>
</tr>
</tbody>
</table>

### 1.2 Intended Use

- The device is manufactured in accordance with the current technological status and the recognized safety rules. However, danger to life and limb of the user or third parties and/or damage to the device and other tangible assets can arise during use.
- The device may only be used for its intended purpose and if it is in perfect working order, and it must be used with regard to safety and dangers as stated in the operating manual.
- The device module mounted on a cab printer of the SQUIX series with a tamp applicator is intended exclusively for applying suitable materials that have been approved by the manufacturer on suitable products. Any other use or use going beyond this shall be regarded as improper use. The manufacturer/supplier shall not be liable for damage resulting from unauthorized use; the user shall bear the risk alone.
- Usage for the intended purpose also includes complying with the operating manual, including the manufacturer’s maintenance recommendations and specifications.

**Note!**

The complete and current version of the documentation can be found in the Internet.
1 Introduction

1.3 Safety Instructions

Attention!
Initiation, adjustments and changing of parts are to be performed by qualified service personnel only.

Warning!
This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

- Before mounting the delivered components disconnect the printer from the power supply and close the shutoff valve of the applicator.
- Only connect the device to other devices which have a protective low voltage.
- Switch off all affected devices (computer, printer, accessories) before connecting or disconnecting.
- In operation, moving parts are easily accessible.
  This applies especially for the zone, where the pad is moved between the starting and the labelling position and the rotating rolls of the module.
  During operation do not reach into that zone and keep long hair, loose clothes, and jewelry distant. Before any manipulations in those areas, close the shutoff valve.
- The device may only be used in a dry environment, do not expose it to moisture (sprays of water, mists, etc.).
- Do not use the device in an explosive atmosphere.
- Do not use the device close to high-voltage power lines.
- Perform only those actions described in this operating manual.
  Work going beyond this may only be performed by trained personnel or service technicians.
- Unauthorized interference with electronic modules or their software can cause malfunctions.
- Other unauthorized work on or modifications to the device can also endanger operational safety.
- Always have service work done in a qualified workshop, where the personnel have the technical knowledge and tools required to do the necessary work.

Danger!
Danger to life and limb from power supply.
➤ Do not open the device casing.

1.4 Environment

Obsolete devices contain valuable recyclable materials that should be sent for recycling.
➤ Send to suitable collection points, separately from residual waste.

The modular construction of the print module enables it to be easily disassembled into its component parts.
➤ Send the parts for recycling.

Table 1  Technical data

2.2 Components

Figure 1  Overview . components

Mounting unit All-around labeler

1  All-around labeler, cpl.
2  All-around labeler module
3  Power supply with cable
2  Mounting foot
4  Connecting cable
5  Foot switch (optional)
Note!
Use the technical documents of the printer and applicator for the installation of these components.

For more information like spare parts lists, service - and configuration manuals of the printer and applicator use www.cab.de .

Figure 2  Mounting

- Mount the All-around labeler module(4) on the adjusting plate A (6) by screws (3).
- Mount the adjusting plate B (8) with the screws (7) on the base plate of the Mounting foot (12).
- Mount the module (4) with adjusting plate A (6) on the adjusting plate B (8) and tighten screws (5).
- Put on the printer at the bolts on the mounting plate (10) and fix the clamp with the knurled screw (11).
- Mount the applicator corresponding the documentation of the printer and applicator (9).
- Connect all cables and the compressed air.
  ▶ Documentation applicator / printer and section interfaces
3.1 Adjust the product position

Figure 3 Mechanical adjustments

It's possible to move the All-around labeler module in X and Y direction to adjust the product (1) in the labeling position to the applicator.

You can also move the product in X direction on the module.

The product must be placed so that the label will put on the edge in rotating direction. So you can get a labeling over the complete label surface.

**Y direction**

- A row of threaded holes in Y direction are present on the base plate (5) and the adjusting plate 2 (7).
  - Mount the module with the screws (4) and (6) in the right position in Y direction.
  - For the final adjustment use the long holes on screws (4).

**X direction**

- For the basic settings loosen screws (6) and move the module into the long holes..
  - For the final adjustment rotate the knob (3) to move the stopper (2) with sensor.

It's possible to choose the rotating direction by Dip switches on the All-around labeler pcb.

<table>
<thead>
<tr>
<th>Dip Switches</th>
<th>ON</th>
<th>OFF</th>
</tr>
</thead>
<tbody>
<tr>
<td>S1-1</td>
<td>without product sensor</td>
<td>with product sensor</td>
</tr>
<tr>
<td>S1-2</td>
<td>rotating direction right</td>
<td>rotating direction left</td>
</tr>
<tr>
<td>S1-3</td>
<td>product sensor reflection</td>
<td>product sensor transmitted light</td>
</tr>
<tr>
<td>S1-4</td>
<td>product sensor reflection</td>
<td>product sensor transmitted light</td>
</tr>
</tbody>
</table>

**Product sensor reflection:** Not suitable for transparent or dark product material.

**Product sensor transmitted light:** Sensor needs enough external light for a certain function.
3 Installation

3.2 Interfaces

Figure 4 Interfaces

1 SUB-D 15 to I/O interface of the printer
2 Round socket foot switch
3 Round socket power supply

3.3 Settings in the printer setup

It is important to set the next parameter in the printer setup to use the All-around labeler in a configuration with printer of the SQUIX series and a SQUX applicator like the S1000:

Setup → interfaces → I/O → Legacy I/O → to activ

Setup → Labeling → Transfer mode → to Roll-on

Time of labelling and product rotation:

Setup → Labeling → Roll-on time → in ms (max. 5 sek)
We declare herewith that the following „partly completed machinery“ as a result of design, construction and the version put in circulation complies with the essential requirements of the Directive 2006/42/EC on machinery:

Annex I, Article 1.1.2, 1.1.3, 1.1.5, 1.1.6, 1.2.1, 1.3.2, 1.5.2, 1.5.8, 1.6.3, 1.7

In the event of any alteration which has not been approved by us being made to any device as designated below, this statement shall thereby be made invalid.

</tr>
</tbody>
</table>

The product must not be put into service until the final machinery into which it is to be incorporated has been declared in conformity with the provisions of the Directive on machinery.

The documents according annex VII part B from the incomplete machinery are created and will commit to state agencies on request in electronic kinds.
EU Declaration of Conformity

We declare herewith that the following device as a result of design, construction and the version put in circulation complies with the relevant fundamental regulations of the EU Rules for Safety and Health. In the event of any alteration which has not been approved by us being made to any device as designated below, this statement shall thereby be made invalid.
