Mounting Instruction

Air Pressure Regulation Unit with ON/OFF Valve Hermes+

Edition: 07/2018 · Part No. 9003268

Versions

- for Hermes+ L - 5955737 Air Pressure Regulation Unit L with ON/OFF Valve
- for Hermes+ R - 5955738 Air Pressure Regulation Unit R with ON/OFF Valve

Contents of Delivery

- Air Pressure Regulation Unit with ON/OFF Valve
- 2 Screws M4x10 (2)
- Connector (3)
- 2 Screws M6x10 (4)
- Winkel (5)
- Plug elec. 4 pin (6)
- Tube (7)

Mounting

Attaching to the bracket

► Attach the air pressure regulation unit (1) with 2 screws M4x10 (2) to the connector (3).
► Insert the slot nuts (7) of the mounted unit into the slot (10) of the bracket.
► Tighten the screws (8).
Attaching to the chassis of the printer

- Attach the air pressure regulation unit (1) with 2 screws M4x10 (2) to the bracket (5).
- Attach the mounted unit with 2 screws M6x10 (4) to the drillings (12) of the chassis.

If the drillings (12) are already used for the attachment of a warning light:
- Dismount warning light.
- Attach the air pressure regulation unit to the drillings (12).
- Fix the warning light at the drillings (11) in the bracket (5).

Electrical Connection

⚠️ Attention!
For the use of versions with ON/OFF valve an emergency stop unit must be connected to the socket (15)!

- Switch off the printer.
- Connect the plug (14) of the ON/OFF valve to the socket (13).

Compressed Air Connection

- Insert the tube (6) into the connector (19) of the air pressure regulation unit.
- Connect the tube (6) to the applicator.
- Connect the compressed air supply (16) to the plug (17). The plug is suitable for a coupling connector DN 7.2.
- Lift the cap (18).
- Set the operating pressure of 4.5 bar.
- Press down the cap (18).
