

Operating Instructions

External Operating Panel (Part No. 5954380.001)

Edition: 3/10 · Part No. 9008683

Contents of Delivery

- External Operating Panel
- Cable SUB-D-9 socket - USB A
- 2 Screws DIN7984-M4x10

Function

The external operating panel is designed as a build-in module and has the same functionality like the printer integrated operating panel.

Additionally the external operating panel is equipped with a slot (1) for a CompactFlash memory card and an USB master interface (3) to connect a keyboard, a scanner or an USB flash drive.

If both panels are connected to the printer you can use both with the same priority. The displays show the same.

It is possible to operate the memory cards both in the printer and in the external operating panel. But you can only operate the card slot set in the setup menu "Interfaces > Default card slot" via the operating panels (see Configuration Instructions). When operating via an interface, each card slot can be addressed via a path (see Programming Manual).

Mounting

- ▶ Prepare the installation point for the external operating panel as shown in the drilling template.
- ▶ Fix the external operating panel with 2 screws (DIN7984-M4x10).
- ▶ Connect the delivered cable at the 9-pin SUB-D plug of the panel and at one of the USB Master interfaces (6) of the printer. The connection may be made while the printer is switched on.

Directly after plug-in the external operating panel is ready.
