

Operating Instructions

Parallel/Centronics Interface (Part No. 5954200)

Edition: 3/10 · Part No. 9008513

Function

With the external Parallel/Centronics interface printers of the A+ and MACH4 series can be connected to the parallel interface of a computer.

To operate the Parallel/Centronics interface printer the firmware version 3.07 or higher is needed !

Montage

- ▶ Connect the Parallel/Centronics interface (1) with the 25-pin plug to the parallel interface of the computer.
- ▶ Connect the Parallel/Centronics interface (1) to an USB-Master interface (3) of the printer using the Mini-USB cable (2).

Startup

After switching on the printer, the computer detects the new hardware component and ask you to install the printer driver.

- ▶ If you want to work with CABLABEL, the installation of the Windows Printer Driver is not necessary because CABLABEL has own internal drivers.
- ▶ Otherwise install the Windows Printer Driver. For that purpose use the "Printer Accessories CD" included in the delivery contents of the printer or download the driver from the cab website www.cab.de.

Setup

The parallel interface basically works in the bidirectional mode.

The bidirectional mode can be switched off in the setup at

```
Setup>Interface>IEEE1284.
```

In that case the interface works as a standard Centronics interface.
