

## Laser marking on camshafts for SMART

**Material:** steel

**Marking by:** engraving

**Cycle time:** 22 sek. (incl. handling)

**Installation:** 04/2000

**Description** Cams of manufactured camshafts are finished by grinding and are then moved to the laser marking system by means of a handling system. A grab enables to lift the shafts into the laser working area to be marked sideways with a backtracing number
