

## Laser Marking on surgical instruments

**Material:** stainless steel

**Marking by:** oxidation

**Cycle time:** 8 sec. (incl. handling)

**Installation:** 07/2002

**Description** Surgical instruments are marked and verified by manual operation with a 2D Datamatrix Code according to HIBC Standard. 2 laser marking systems have been installed in a Mobile Marking trailer enabling markings to be carried out straight on site at the customer's place (hospital)
